

THE WHOLE WORLD JUST A BREATH AWAY

INTEGRAMOUSE®
INTEGRASWITCH®

INTEGRAMOUSE®

YOUR GATEWAY TO THE WORLD

Games, communication, information, work. Today's life cannot possibly be imagined without having the computer. With LifeTool's **INTEGRAMOUSE®** you can operate the computer solely by mouth. The slightest movement of your lips will control the mouthpiece and thus move the mouse pointer dynamically across the screen. By mere sipping and puffing through the mouthpiece, you can trigger left and right mouse clicks, double clicks as well as drag&drop actions as with any standard mouse.

INTEGRAMOUSE® was developed for people suffering from paralysis (quadriplegia), progressive muscle diseases or arm amputations.

Use **INTEGRAMOUSE®** and you will experience the meaning of quality of life, privacy and independence.

INNOVATIVE, PATENTED, LICENSED AND AWARDED

INTEGRAMOUSE® is licensed according to the European Medical Device Regulation. The patented mouthpiece can be exchanged and cleaned easily and thus hygiene is not a problem if the device is used by several people.

Discover the advantages of INTEGRAMOUSE®:

- easy installation via plug&play (no driver/ installation software needed)
- left and right mouse clicks, double click, drag&drop without additional software
- dynamic control of the mouse pointer by slightest movements of the lips
- no external power supply needed, fully compatible with Windows 98™ or higher
- word processing via on-screen keyboard (part of Windows XP™)
- compatible with Apple Mac™ and Linux™ operating systems
- designed to be used by different persons due to easy exchange routine of the mouthpiece
- complies with the highest hygienic standards
- may be used in an upright or lying position
- no devices mounted to the user's body, allows for absolutely independent use of the computer
- awarded with Austrian Innovation Award 2003, German RehaCare Innovation Award 2003, Spain Orprotec Innovation Award 2004, EU-Gateway to Japan product 2004, Czech Golden RehaProtex Award 2005, and as a Russian RehaTech product 2006.

INTEGRASWITCH®

THE NEW HYGIENIC STANDARD

Environment control systems, communication devices, adapted toys, software programs or emergency call systems for people with severe physical impairments may be operated by the INTEGRASWITCH® .

- the ONLY sip-puff switch licensed according to the European Medical Device Regulation
- easy and efficient cleaning of the mouthpiece (e.g. in the dishwasher)
- mouthpiece is 100% hygienic , exchangeable, bio-compatible and latex-free
- mounting system can be chosen individually
- 2 exits for dual function (1 exit for sipping, 1 exit for puffing)
- sipping and puffing pressures can be adjusted separately
- no power supply needed
